## Timing

- Date : Friday, February 7<sup>th</sup> & Saturday, February 8<sup>th</sup>
- Track : Pirelli Sottozero Center – Arctic Falls – Vistträsk – Sweden.
- Type of evaluation : Comparative acceleration and braking tests on snow  
Comparative handling test on snow

- DEKRA Test Center :
  - 1 Engineer performing acceleration & braking on snow.
  - 1 Specialized driver performing handling test.
- PIRELLI :
  - 2 tire fitters to mount the tires and perform tires change during the test.

## Pirelli – Acceleration / Braking / Handling Snow – 205/55 R16 Winter of 07/02/2025

Air and track temperature sensor.

1 Recorder 100 Hz to measure braking distance and acceleration times.

1 Racelogic Vbox 10 Hz to measure lap time.

1 lift.

1 vehicle VW Golf 8 with Engine 1.5L TSI 150 HP with manual gearbox.

Vehicle's load : 1 driver

**Pirelli – Acceleration / Braking / Handling Snow – 205/55 R16 Winter****Tire list**

BRIDGESTONE	Blizzak 6 - 205/55 R16 94H M+S	DOT 276 100UKA 4224
CONTINENTAL	WinterContact TS870 - 205/55 R16 94H M+S	DOT 1HW 03F9N1 4724 & 4824
GOODYEAR	Ultragrip Performance 3 - 205/55 R16 94H M+S	DOT 1DMOF 4Y1R 4924
MICHELIN	Alpin 7 - 205/55 R16 94H M+S	DOT 1HD WC 158X 4224
PIRELLI	Cinturato Winter 3 - 205/55 R16 94H M+S	DOT 93 4924

Tires have been provided by PIRELLI

Breaking in of all tires for 100 km at 80 kph with 1 driver + 1 passenger RF + 2 passengers and 40 Kg rear

Report 24CPCEXT-317  
of 07/02/2025

## Acceleration / Braking snow

This report is only valid in its integrality. An extraction or partial utilization of results for an external publication will be done under PIRELLI responsibility.

# Pirelli – Acceleration / Braking Snow – 205/55 R16 Winter

## Test Protocol

Morning - Test Sequence : Control (Pirelli) / Bridgestone / Continental / Goodyear / Michelin / Control (Pirelli)

Afternoon - Test Sequence : Control (Pirelli) / Michelin / Goodyear / Continental / Bridgestone / Control (Pirelli)

Type of test : Full ABS braking.

Braking distance measurement : from 35 to 10 kph, start of braking at 35 kph + 3 kph.

Type of test : Acceleration

Acceleration time measurement : Movement of car on 10/20 cm, from 10 to 35 kph, full throttle in 1st gear

Surface : snow track prepared with packed fresh snow.

Tire Pressure :      Front : 2,5 bar.      Rear : 2,5 bar.

During the test, the driver does not know which tires are mounted on the vehicle.

# Pirelli – Acceleration / Braking Snow – 205/55 R16 Winter

## Test conditions

Number of braking : 12 performed, 10 are validated for the test.

Number of acceleration : 12 performed, 10 are validated for the test.

Temperature : Constant – Test indoor

Air : - 7.0 °C

Track : -8.0 °C

Wind speed : No – Test indoor

Tire set validation :

Acceleration - standard deviation less than 2.3 %. Difference mini/maxi : 0,25 second

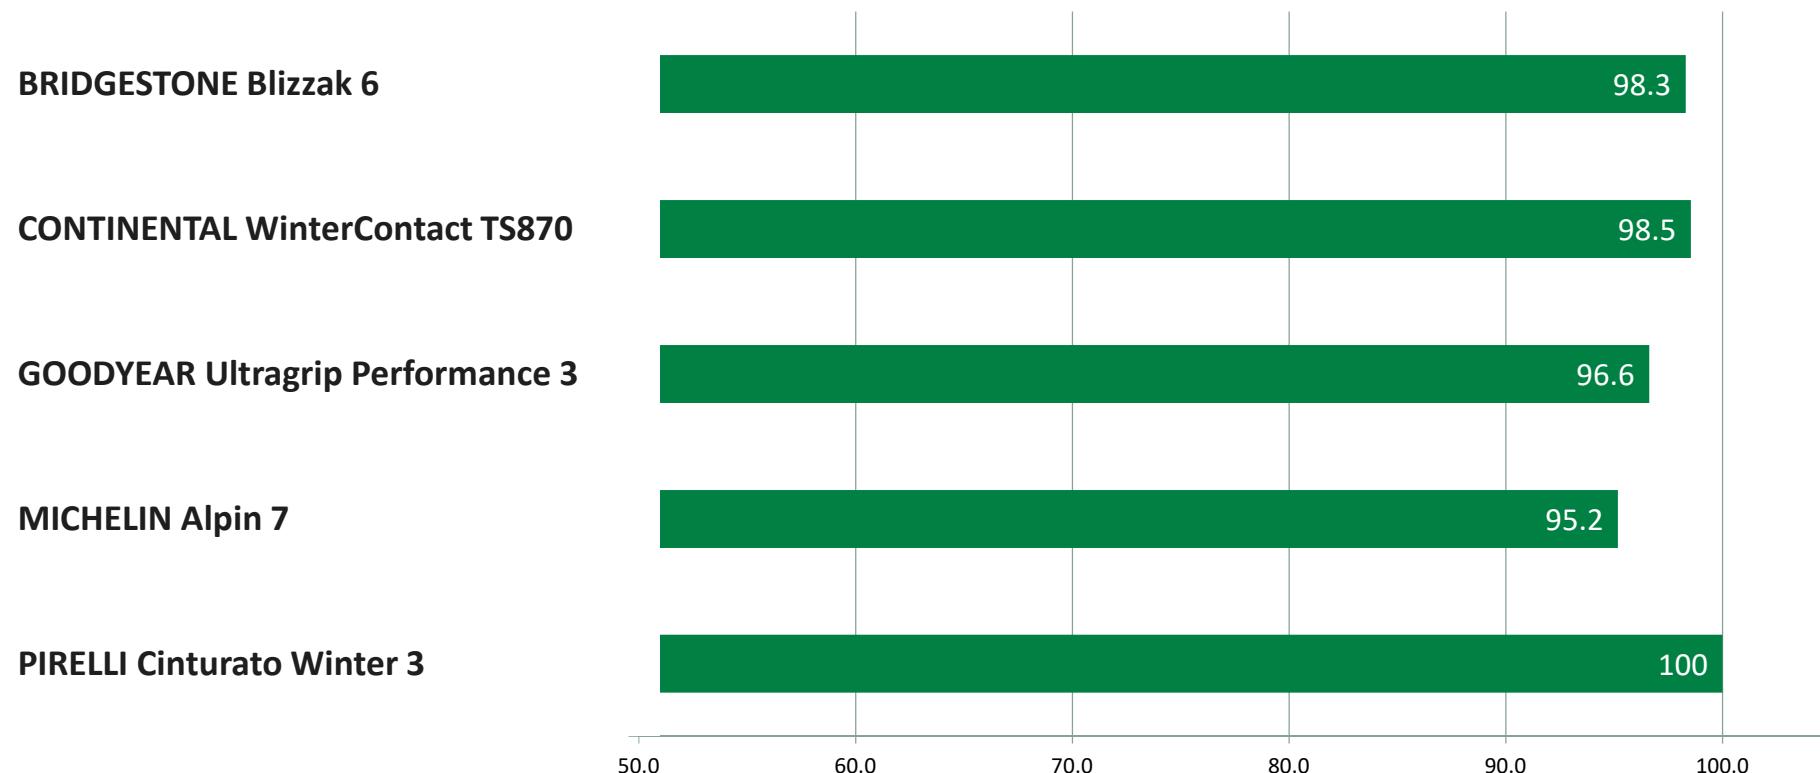

Braking - standard deviation less than 2.1 %. Difference mini/maxi : 0,80 meter

# Pirelli – Acceleration / Braking Snow – 205/55 R16 Winter

## Results – Snow braking

Snow braking distance (%) - 35 to 10 Kph

Min / max braking distance's difference between the best and worst : 0,55 meters

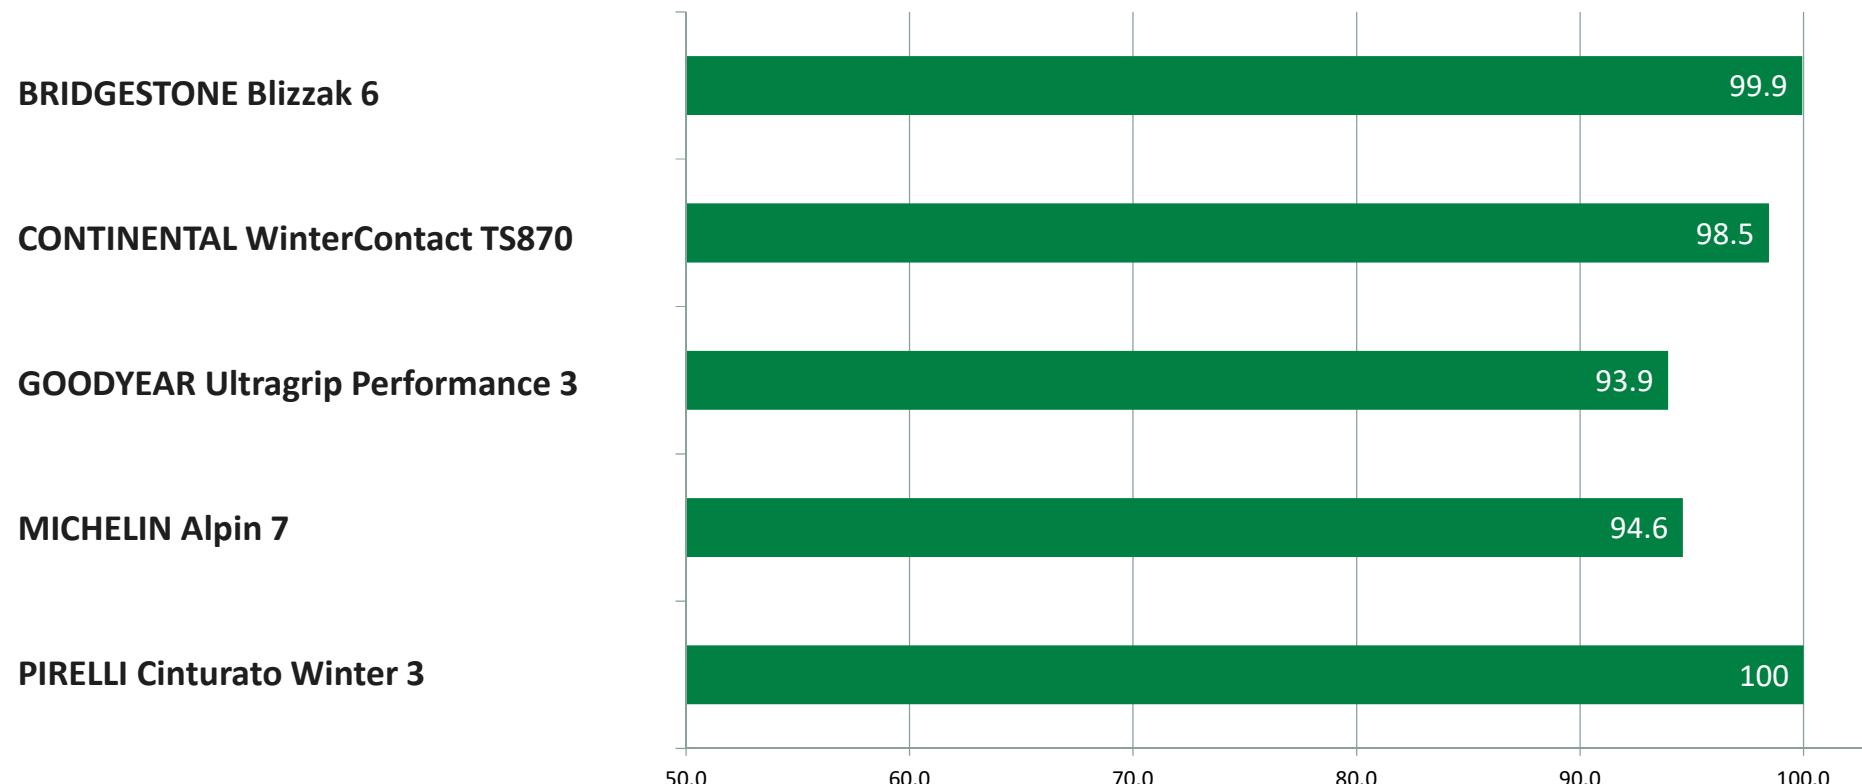

This report is only valid in its integrality. An extraction or partial utilization of results for an external publication will be done under PIRELLI responsibility.

# Pirelli – Acceleration / Braking Snow – 205/55 R16 Winter

## Results – Snow acceleration

Snow acceleration time (%) - 10 to 35 kph

Min / max traction time's difference between the best and worst : 0,21 second

Report 24CPCEXT-317  
of 07/02/2025

## Handling

This report is only valid in its integrality. An extraction or partial utilization of results for an external publication will be done under PIRELLI responsibility.

# Pirelli – Handling snow – 205/55 R16 Winter

## Test Protocol

Report 24CPCEXT-317  
of 07/02/2025

Test Sequence : Control (Pirelli) / Bridgestone / Continental / Control (Pirelli) / Goodyear / Michelin / Control (Pirelli)

Type of test : Handling test.

Lap time,

Subjective comments for each set of tires

Surface : snow track prepared with packed fresh snow.

Tire Pressure :      Front : 2,5 bar.      Rear : 2,5 bar.

During the test, the driver does not know which tires are mounted on the vehicle.

# Pirelli – Handling Snow – 205/55 R16 Winter

## Test conditions

Number of sequences : 7 laps performed, 3 are validated for the test.

Temperature :

Air : between - 6.0 and -2.3 °C

Track : between -7.5 and -3.3 °C

Wind speed : no wind

Tire set validation :

Laptimes - standard deviation less than 0.3 %. Difference mini/maxi : 0,5 second

Report 24CPCEXT-317  
of 07/02/2025

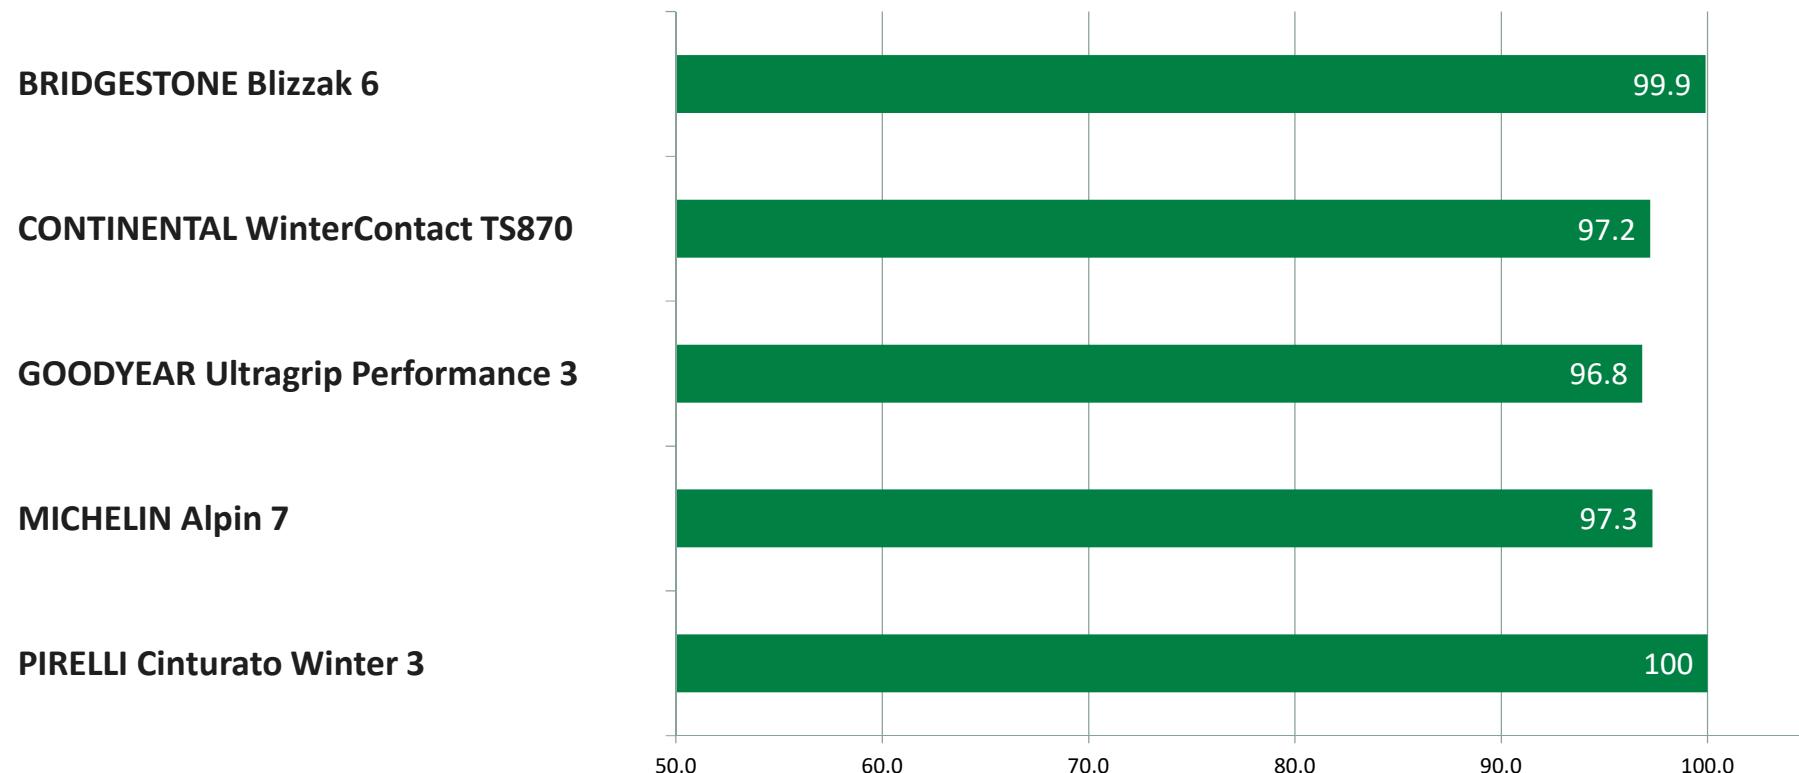

# Pirelli – Handling Snow – 205/55 R16 Winter

## Results – Laptime

Snow handling laptime (%)

Min / max laptime difference between the best and worst : 2.3 second

This report is only valid in its integrality. An extraction or partial utilization of results for an external publication will be done under PIRELLI responsibility.

# Pirelli – Handling Snow – 205/55 R16 Winter

## Subjective driver comments

BRIDGESTONE Blizzak 6 :

Close to Pirelli but slightly under for the braking especially in curves.

Good feeling in large curves.

CONTINENTAL WinterContact TS870

Rear grip lost easily and not progressively : It comes suddenly.

Good grip recovery just by accelerating or moving the steering wheel.

GOODYEAR Ultragrip Performance 3

Rear grip is lost quickly. The front can't compensate. Need to decelerate to recover the grip.

No good feeling during braking.

MICHELIN Alpin 7

Rear grip lost quickly but front keep the control of the trajectory. Good feeling because the loss of grip is progressive.

Braking distance is long..

PIRELLI Cinturato Winter 3

Confidence during braking.

Rear grip is lost gradually but front keeps the control of the trajectory.

A small correction of the steering wheel or acceleration is enough to recover the trajectory

Report 24CPCEXT-317

of 07/02/2025
